*Suaf!...*

*suaf...*

*Suaf!...*

Trece....

*suaf....*

Let's **run away**...

*Suaf!...*

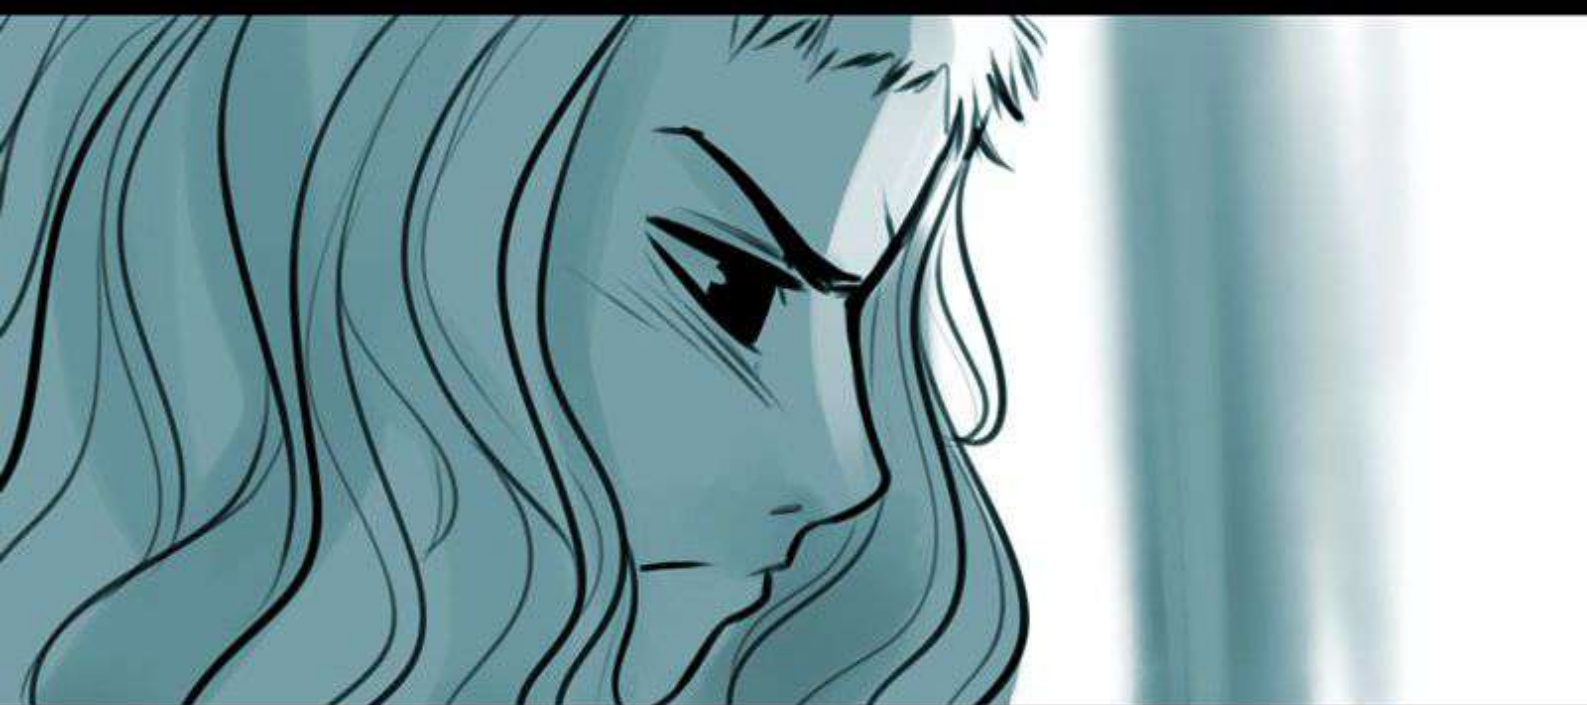

*suaf....*

Are you sure, Mura?

*Suaf!...*

I am.

**Humans and dragons**  
have lived together since time immemorial.

Some humans and dragons developed a close  
relationship, which was called **The Link**.

With this tie, humans could use **the magic** of their  
fellow dragons freely ...

They were known as **Jinetes**

**But there are no more dragons left.**

**The Virus killed them.**

Or rather, it ended their **conscience.**

Nowadays, humans are investigating how to cure this disease, while protecting themselves from the insane dragons.

For this, they use the descendants of the ancient **Jinetes**, they must go at the age of **15** to the Academy, where they will be instructed.

There is no other place for them.

They have to be controlled.

Because they are also dangerous, although they no longer have **magic** to use, because there exist no longer any **Links**.

...Or does it exist?

SHAAA...

I imagined  
it **bigger**

...

I mean,  
**The  
Academy**

It doesn't  
seem that  
many people  
can live  
there

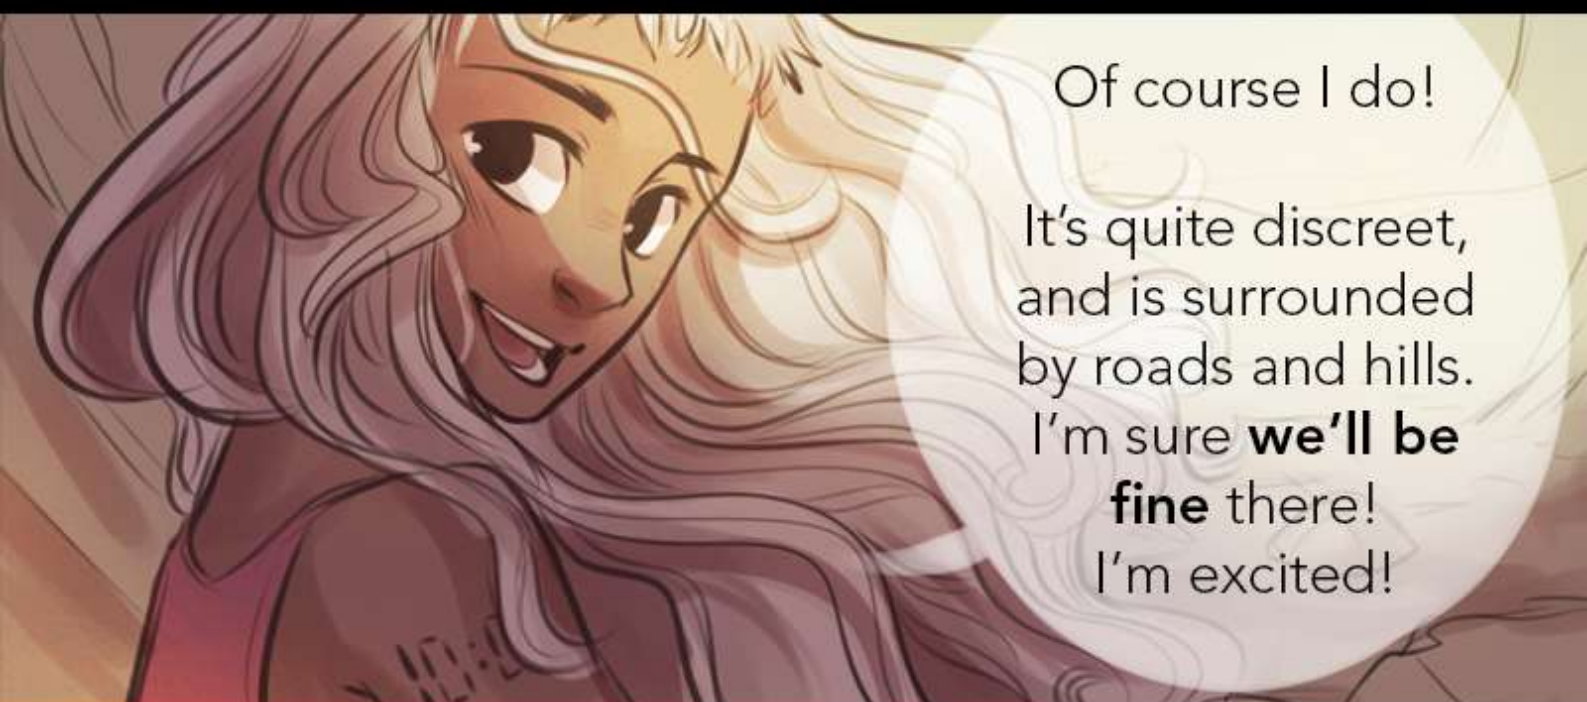

There are  
only **7**  
auxiliary  
domes  
...

And  
**the Main Dome.**  
There are the  
common areas,  
right?

You  
don't  
like it?

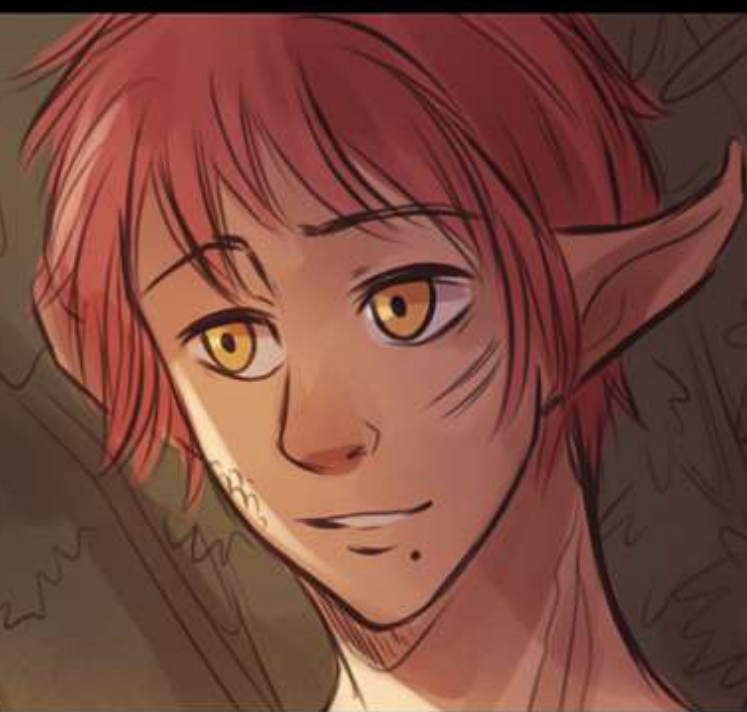

Of course I do!

It's quite discreet,  
and is surrounded  
by roads and hills.  
I'm sure **we'll be**  
**fine** there!  
I'm excited!

We should  
prepare  
to go.  
It's going  
to be  
7am.

But first we have to practice!

I'll do some questions about history!

But I learned everything by heart ...

So we should remind our false names!

But I already know I have to say "I'm **Roy from Jare**"...

It's okay!  
I just hope  
everything goes  
as we planned.  
Otherwise I'll  
have to use **your**  
**magic** for that  
too...

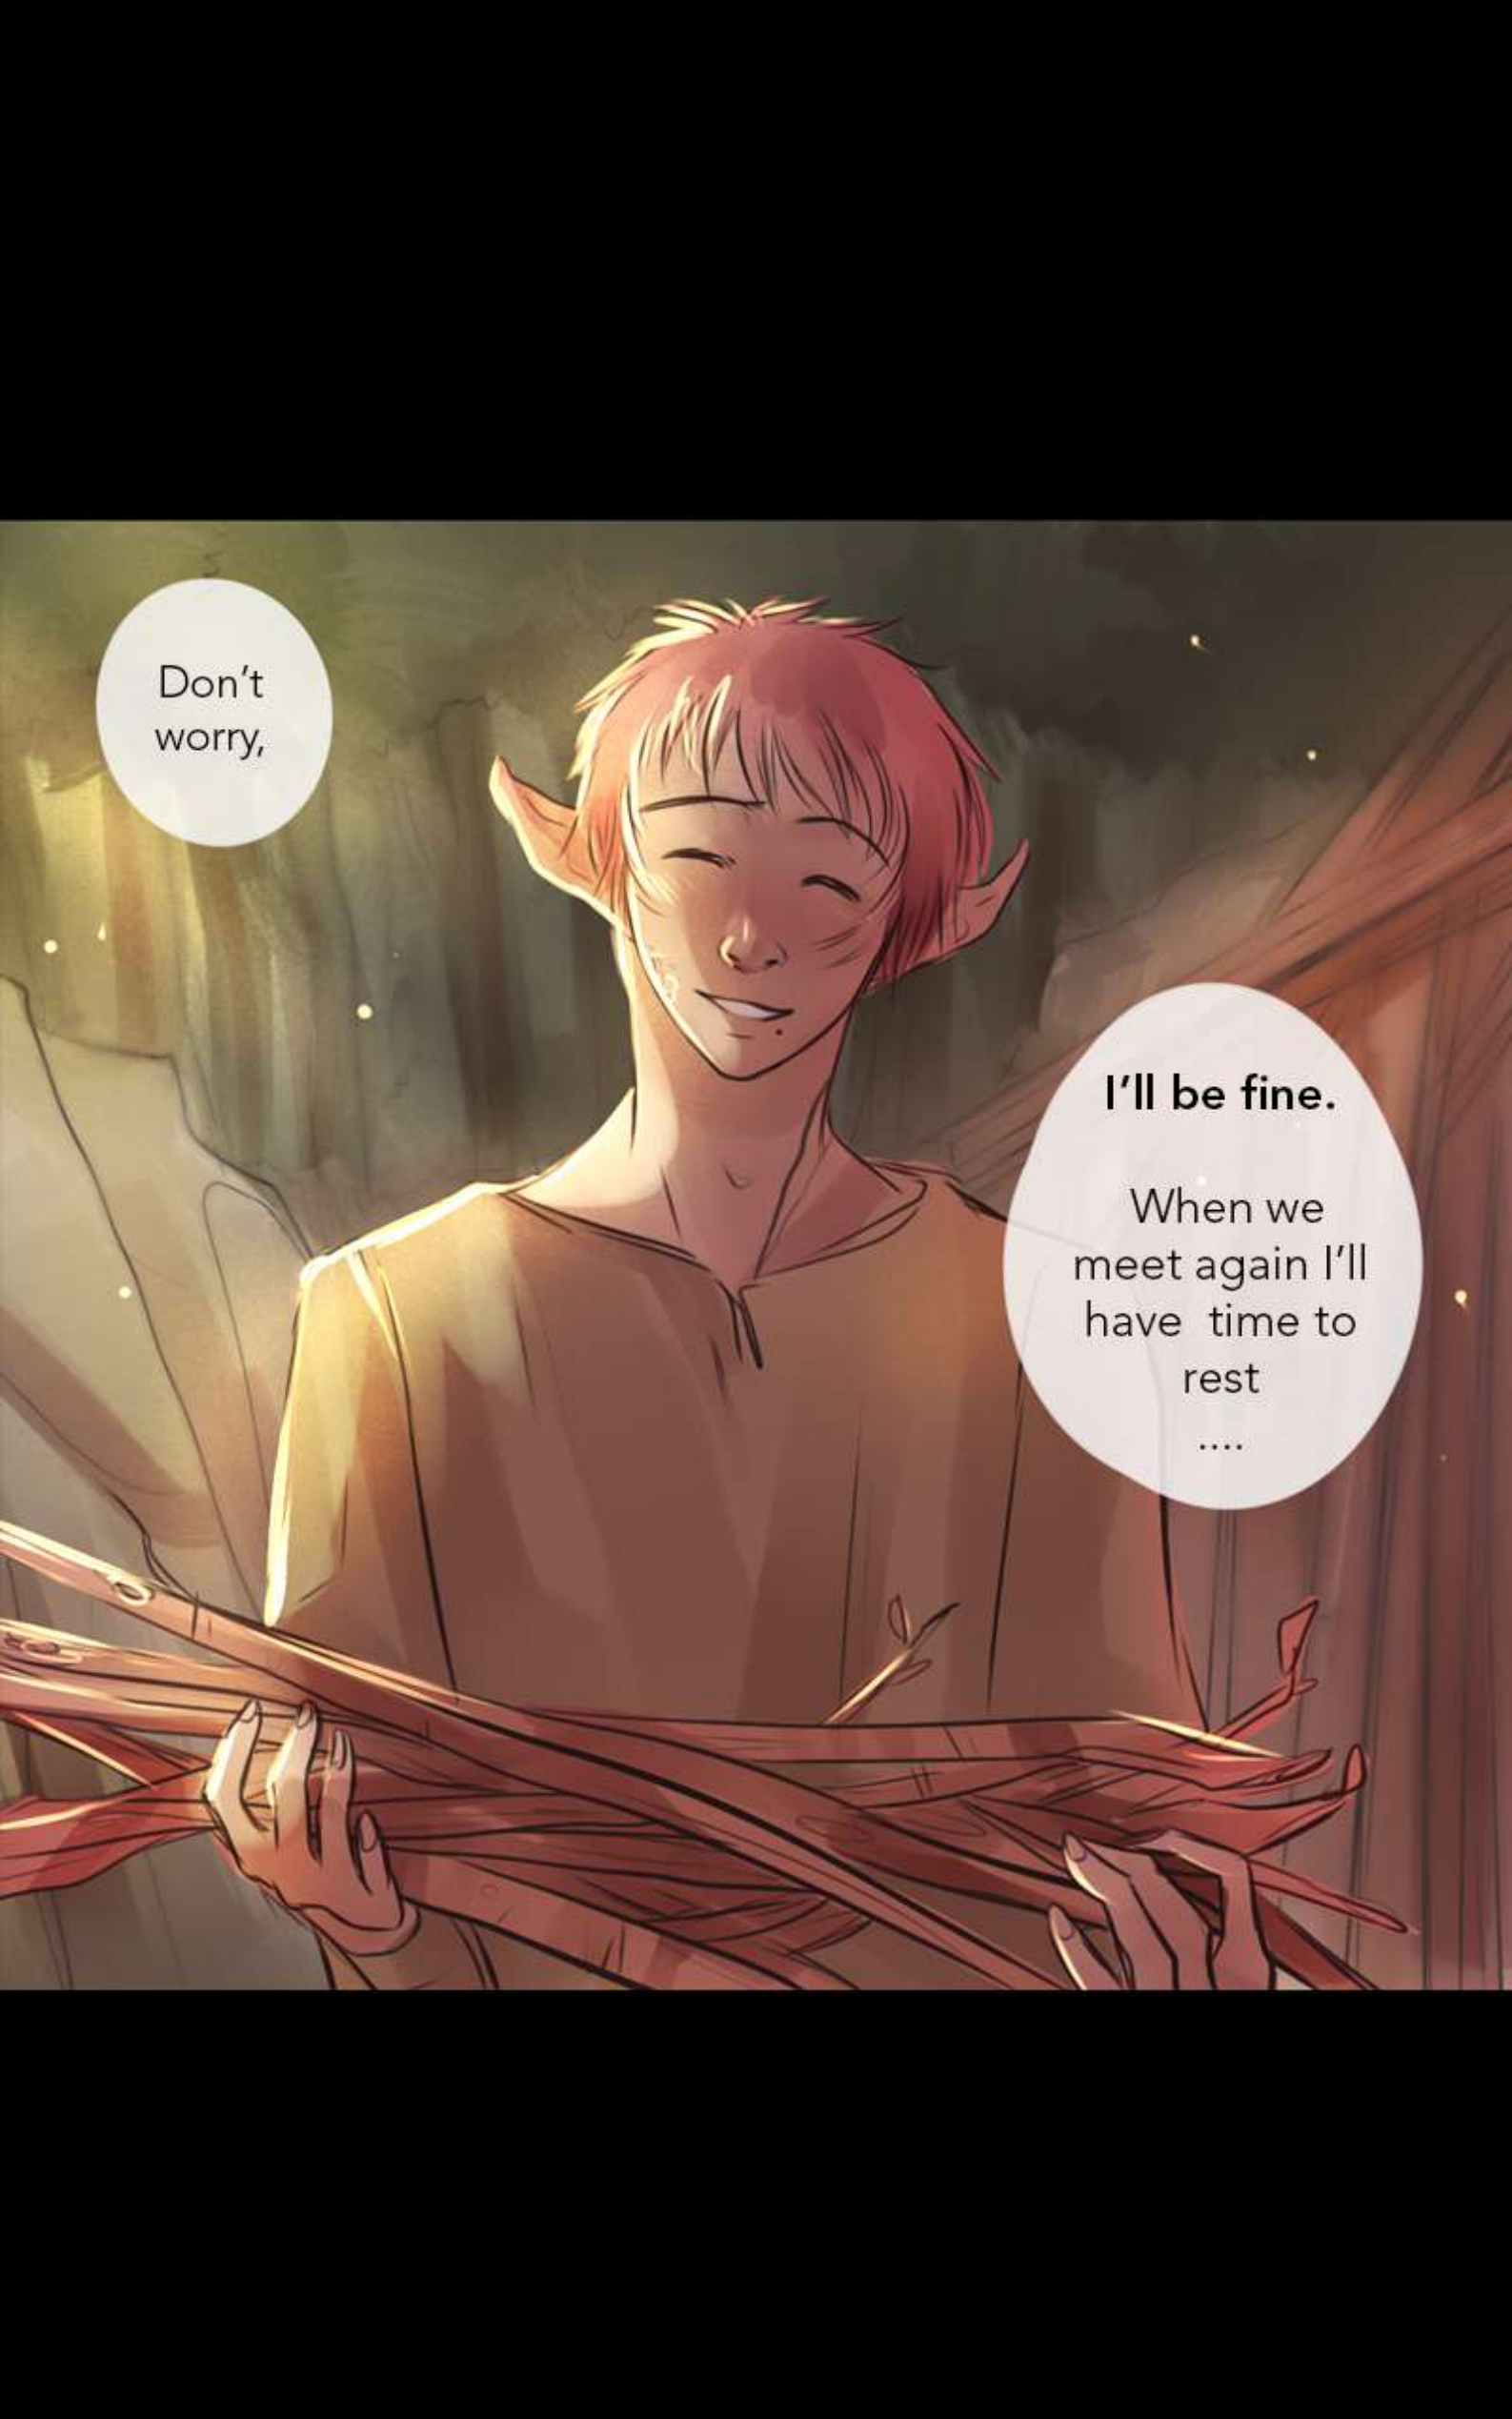

Anyway,  
**Trece....**

I will  
be many hours  
using it.  
Do you think  
you **could**  
**resist** until we  
meet again?

Uh?  
Are you  
worried  
about  
that?

A young elf with short, spiky red hair and pointed ears. He has a gentle smile and his eyes are closed. He is wearing a simple, light-colored tunic. He is holding a bundle of long, thin sticks or branches across his chest with both hands. The background is a dark, textured surface, possibly a cave or a forest at night, with some faint light spots.

Don't  
worry,

**I'll be fine.**

When we  
meet again I'll  
have time to  
rest

....

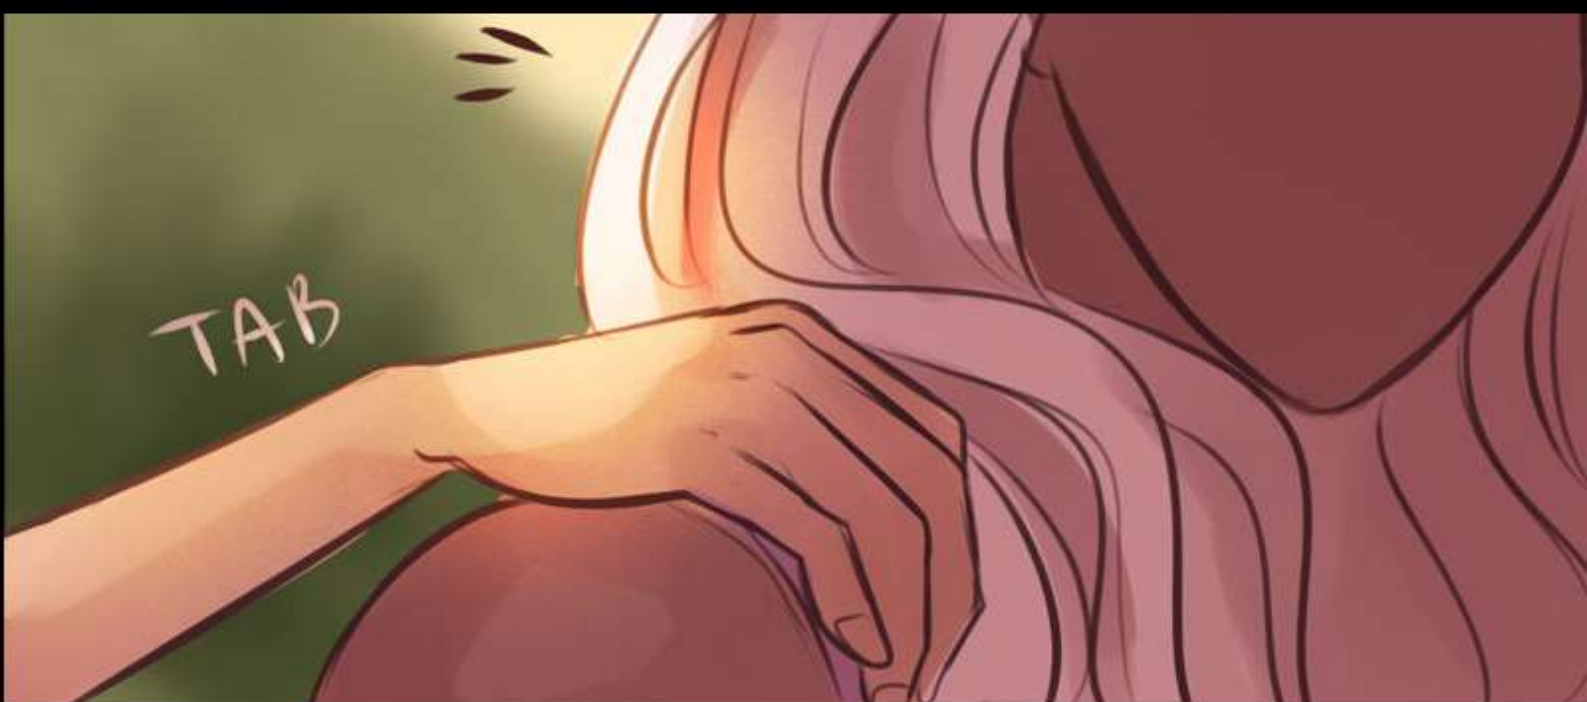

Then we should focus on **getting rid** of the shelter.

**I'll burn it**

We can't leave any trace

TAB

Wait...

What do you think I was collecting firewood for?

Oh! That makes sense!

Ehm...

I haven't thought  
about **how to**  
**turn it off**. Maybe you  
should...

Yeah...  
I think I should  
turn  
it off with water  
or something

...

You should  
go now...

Although  
the call is **by  
list order**, it's  
better to be  
punctual.

All right,

See you later,  
**Mura**
