
[Prime Avatar]: A prime avatar is a physical and spiritual gestalt that serves as a mortal anchor for transcendent power. It does not have a soul of its own, serving as a vessel through which your soul can be expressed, fully embodying your consciousness and mortal power. The power of your avatar is limited to your mortal power and serves as a means to grow that power. As the anchor for your transcendent power, the prime vessel is required to exert certain aspects of that power upon physical reality.

[Numen]: Your transcendent power has aspects of divinity that are imbued into the avatar that is the mortal embodiment of your will and power. Your avatar can express that power in ways that reflect your hegemonic and defiant nature. Traits and abilities your avatar inherits include: establishing spiritual domains; Akashic Speech; stripping and transforming remnant magic from magic entities you have killed or destroyed; being immune to rank suppression as well as detection, tracking and assessment magic; negating aura-related abilities by fully suppressing the aura of the ability's user.

[System Administrator]: Gain access to all aspects of the system, along with additional interface features such as maps, voice and image chat, party and raid group functionality, and the ability to assess creatures and objects. You can grant these additional features to others in a party or raid group. You can access the system interface of others if you have their permission or have suppressed their aura.

[Relics of the King]: Access the astral throne, astral gate and soul forge to limited degrees. Reinforce the stability of dimensional spaces through your presence and transgress sealed or unstable dimensional apertures. Exceed the normal limitations of portal abilities at the cost of additional mana, potentially suffering backlash for extreme expenditure. Use your aura to suppress spiritual manipulation and suppress or enhance soul attacks.

[Sacred Phoenix]: Soul-based abilities learned prior to astral nexus transfiguration have been refined for use by your prime avatar. Afflictions can also add [Ghost Fire]. On suffering damage that would be lethal, transform into a ghost fire phoenix. After ghost phoenix transformation is triggered, it cannot be used again for one year. That time is reduced by absorbing life force, and further reduced by life force containing fundamental reality material.

[Palanquin]: Your dark essence familiar can transform its bodies into one or more forms of transportation. These forms can offer luxury and utility but are relatively fragile for their rank. Your blood familiar can reinforce any single form, enhancing its durability, allowing it to repair itself rapidly and heal anyone inside with moderate efficacy. Your doom familiar can add offensive and defensive capabilities any single form.
