About the Game

I could never have imagined the life that I have now. I live each day with no regrets, but that wasn't always the case.

I was always the "good girl" who did everything perfectly. I colored inside the lines and never knew what I was missing. When I caught my boyfriend cheating with my best friend, I decided enough was enough. I left college and moved to the city, taking my life in my own hands. Now each day is an adventure, especially for someone as inexperienced at...well, everything...as I happen to be. Moving in with two hot guys started me down a path of temptation, and I'm only looking forward from here. I can't wait to share all my experiences with you.

In Her Own Hands is a compelling, HTML-based, adult game featuring a young female protagonist and the temptations that await her in the city. This immersive life sim was intentionally created to offer a sex-positive exploration of a woman's sexual journey. Her erotic adventures know no bounds but are grounded in consent. She retains full agency over her decisions, no matter what consequences might follow. The *IHOH* story will continue to unfold as you connect with her personality, molding her character and journey according to your own will as you are presented with meaningful choices at every turn.

Note: This game will not contain coerced or forced sexual activity, nor any incestuous relationships. This does not mean that the character will not have the opportunity to willingly participate in consensual sexual kinks.

The main character's default name is **Becca Johnson**. You can change this name. For purposes of this walk-through, however, she will be called "Becca."

Loading a Save Game from a Previous Version

If you want to begin from where you left off in version 0.4.0 or 0.4.1, just follow these steps:

1. Click “SAVES” link on the left sidebar.
2. “LOAD” the desired saved game from version 0.4.0 or later.
3. Click “PHONE” link on the left sidebar.
4. Click the *TitKok* app icon.
5. Click “Check for Save game version.” This will tell you whether your Save should be updated:
 - If the Save is from a version of the game earlier than 0.4.0, it cannot be updated and you will have to start from the beginning.
 - Based on your Save game version, an update link will appear. Click this once. It will initialize new variables to ensure compatibility with the current version.
6. IMPORTANT: Only click the update link one time.
7. Click the “Turn off phone” link, and you should be able to continue where you left off without any problems!

Please note, we sometimes go back to earlier content and update it, refresh it, or improve it in some way. The best way to explore the full game while it is still in progress is to start from the beginning each time. We are trying to include enough content that making different choices will provide a different experience each time!

This utility is experimental, so please let us know if you experience any problems accessing new content after using it. Email us at bugs@surprisedelightme.com with details or let us know on Discord. Thanks!

Left Sidebar Menu

The following commands/functions appear on the left side panel menu:

Phone

Becca now has a fully functional smart phone. See below for a detailed description of available apps.

Wait A Bit

This function will allow Becca to wait without doing anything, in segments of 15 minutes, 30 minutes, 1 hour, or 2 hours. Time will pass, but the location and the *Energy* will stay the same. **Warning:** Many events are time-sensitive, so using this function may cause some events to either delay or not appear at all. So choose your use of this function wisely, and only if you know that you will not miss something!

Progress (Progress Tracker)

The Progress Tracker shows vague hints for triggering and viewing various events within the game. Several life-related hints and reminders appear in the first bulleted list. The second bulleted list, titled “‘To-Do’ List,” contains hints and reminders related to relationships with other people. These hints

Statistics

There are a few statistics that you will need to keep track of:

Money: Becca can earn money and spend money. She also has to pay rent on the first of every month. Not doing so would be pretty bad.

Energy: Becca has 150 *Energy* units total. Many activities use a little bit of *Energy*, while more physical activities like exercising use more *Energy*. Other activities—like sleeping, taking a nap, or drinking caffeinated beverages—restore *Energy*. When your *Energy* reaches 0, you should probably sleep in your bed!

Arousal: Becca’s *Arousal* goes up when she thinks about sex. This could be something direct, like watching pornography, or something a bit less direct, like thinking about hooking up

with a hot guy. It will go down when Becca cums. Expect it to go up and down pretty often throughout the game.

- Romance:** Becca's *Romance* level begins at 100 and decreases. It measures her interest in falling in love and entering a committed, monogamous relationship. Physical relationships without commitment, for example, will lower this statistic.
- Inhibition:** Becca's *Inhibition* level begins at 500 and decreases. It measures just how much Becca is willing to do without regret. It basically represents her conscience. If it reaches 0, Becca will have no conscience left and regret none of her actions.
- Corruption:** Becca's *Corruption* level measures your openness to "immoral" activities. It begins at 0 and grows based on Becca's decisions. Higher *Corruption* will allow her to do more perverted and more criminal actions.

Inhibition and *Corruption* are both calculated in relation to other statistics, so high *Arousal*, for example, may make *Inhibition* temporarily decrease. Her experience, wardrobe, and other factors directly affect these statistics.

Lil Backpack

This will show Becca's inventory. It holds a few things that no girl can live without: her wallet, some make-up, and a crumpled-up receipt from like two years ago. Any items that you obtain throughout the game will also show up here (unless otherwise noted). There's not much yet in this version, but it will certainly come into play later on.

Phone Functions

Maps

Every location that Becca has discovered appears here, grouped into “Home Street,” “Uptown,” and “Downtown.” You can click on one of these areas to travel directly to them with a cost to time and *Energy*. NOTE: Be careful when using the direct travel option, as you might miss some scenes or events that occur while traveling back and forth to/from different locations.

Contacts

This app provides the names of other significant characters that Becca has met, as well as their relationships with her.

For each character, the game tracks two statistics. Both refer to the character’s perception of Becca.

- Friendship
- Attraction

Friendship and *Attraction* will interplay in interesting ways in some relationships. Someone with high *Friendship* and low *Attraction* might put Becca in the “friend zone” while someone with high *Attraction* and low *Friendship* might use her for sex, for example. Someone with both stats high might be open to a “friends with benefits” relationship. There are, of course, many different possibilities as the game develops.

Ca\$h Bank

This app only becomes functional after Becca opens her bank account. After that you can use it to make a direct bank transfer. So far, this is only used for paying your student loan to your father; the link is only active on the first day of each month.

TitKok

TitKok is the hottest new social media platform for young people! Becca, of course, is all over it!

For players of *IHOH*, TitKok is also an experimental way of updating your saved games from one version to the next version.

Settings

With this app, you can select different backgrounds for your phone. As the game goes on—and Becca experiences new things and takes new pictures—the selection of available backgrounds will grow. (See *Camera* and *Photos* app descriptions below.)

Interwebz

This app currently only displays a handful of random memes. *This function will be expanded in future versions.*

Photos

Becca can use this app to see her growing photo gallery. (See *Camera* app description below.)

Phone

Making a phone call

You can call anyone whose phone number you have. A list of names will appear when you click the app icon (as long as your phone is not already ringing).

Receiving a phone call

The notification “**Your phone is ringing!**” will appear in the left side bar from time to time. When you see this notification, you will need to click the Phone link in the sidebar and then answer the phone. The phone conversation will then appear. The notification will disappear at the conclusion of the phone call.

Messages

Sending a text message

You can text anyone whose phone number you have. After you click on the app icon, click on the link “Send a text message” and a list of names will appear.

Receiving a text message

The notification “**You have a text!**” will appear in the left side bar from time to time. When you click on the app icon, another notification will appear in bold at the top of the screen saying, “You have a text from XXX.” Click on this link and the text message will pop up on the screen. Both notifications will disappear when you turn off the phone.

Text message archive

If you want to view old texts again, they will appear on the bottom of the “Text messages” screen under the heading “Old texts (archived).” Clicking on the links for specific texts will cause them to pop up on the screen.

Camera

Becca can use this app to take selfies. Right now, there are only a few selfie images available (three for inside, three for outside), but the number and nature of selfies will be expanded as the game continues to be developed. Future selfies will include different environments, clothing, and situations, as applicable.

Wardrobe

The **Wardrobe** system in *IHOH* allows for great flexibility in outfit choices. Becca starts with a handful of clothes, but there will be opportunities to purchase additional items of clothing.

A “full outfit” consists of a top, a bottom, a bra, panties, and shoes.

However, certain activities do require specific outfits at the beginning of the game:

- You have to be wearing a full outfit to leave the apartment.
- You have to be wearing a top, a bottom, and panties to leave your bedroom.
- You have to be wearing activewear to exercise (yoga in apartment, working out in gym).
- You have to be wearing sneakers to go for a long walk or jog.

As Becca’s *Inhibition* lowers, these requirements will change (see “Wardrobe Requirements” below).

Some jobs have uniforms. Becca is supposed to wear her uniform to work, but if you forget to do so, who knows what might happen?

Status

At the top of the **Wardrobe** page, a *Status* text will tell you what items of clothes Becca is currently wearing (or not wearing).

Outfit totals

Each item of clothing has a score in three categories: Comfy (i.e. comfort), Naughty (i.e. sexiness/sluttiness), and Professional. You can use the total outfit score to determine whether your outfit is appropriate for the scenario. *As time goes on, we will be adding alternative reactions from characters in different scenes based on what she is wearing!*

Changing Your Clothes

The **Wardrobe** separates clothing items into several categories:

- Intimates (Bras and panties)
- Sleepwear
- Tops
- Bottoms

- Dresses
- Uniforms (for work)
- Shoes

To change into a certain item of clothing, simply click on the appropriate category.

Each item of clothing in the **Wardrobe** includes the following:

- For any item that you are currently wearing, a link to *Remove* the item.
- For any item that you are not currently wearing, a link to *Wear* the item. This will replace any similar item of clothing that you are currently wearing with the new item. For example, if you are wearing *Cotton bikini panties* and you click the *Wear* link for *Black thong panties*, the cotton panties will be replaced with the thong panties.
- Links to **Save to Clothing Set 1**, **Save to Clothing Set 2**, **Save to Clothing Set 3**. See below.
- Sleepwear has a special shortcut. Rather than saving to one of the saved Clothing Sets, you can simply identify one of the items of Sleepwear as the default. A separate Sleepwear shortcut is available from the main **Wardrobe** page.

Saving and Using Clothing Sets and Shortcuts

There are four empty clothing sets on the **Wardrobe** page when you begin: one for Sleepwear and three that can be used to save outfits.

1. To set the **Sleepwear** shortcut, click the Sleepwear link, and click the “[Set as default sleepwear]” link following the type of Sleepwear that you would like to set to the shortcut. You can now use the “Wear Sleepwear” and “Remove Sleepwear” links.
2. To save an outfit to either of the two Saved Clothing Sets, click on each category of clothing, and select an item of clothing to save to **Clothing Set 1, 2, 3, 4, or 5** by clicking on the appropriate link. You can now use the “Wear Saved Clothing Set 1” link to instantly change into Clothing Set 1, the “Wear Saved Clothing Set 2” link to instantly change into Clothing Set 2, and so on.
3. If you want to change one of the two Saved Clothing Sets, just click “Clear set.” The set will clear, and you can select new items to add to your clothing set.

TIPS:

- Don’t forget to add shoes to each of your saved clothing sets!

- You can use the clothing sets for different purposes. For example, use one of the sets to save a normal, everyday outfit, another to save a workout outfit, another to save a “date night” outfit, etc.

Surprise & Delight's CumPoints Sex System

Beginning in version 0.4.0, we have introduced the *CumPoints* Sex System. Inspired by the combat systems in other RPGs, many of the game's sex scenes will use this new system.

As a sex scene commences, the right sidebar panel will automatically pop out, displaying status bars for Becca and her partner. Becca can choose her actions during the sex scene (though she may not have much control over her partner). Different choices will increase the "CumPoints" reflected in the side panel status bars. When the *CumPoints* reach 100, the person will cum. Women can cum multiple times, but men can only cum once, ending the sex scene.

Different partners will have different skills and preferences, so the effect of one action on one partner may not be the same as the effect of the same action on a different partner. Becca herself also has different skills and preferences. These develop throughout the game based on Becca's choices, but will be most noticeable in the way that sex acts behave. For example, if Becca has a preference for large—*ahem*—male anatomy, then those men who are "endowment-challenged" may be less satisfying to her, decreasing the number of *CumPoints* she might get from intercourse with one of these men. On the other hand, if Becca develops her oral skills, she may be able to make a man cum faster through this action.

This system includes a variety of possible endings. There are differences in both text and media depending on what act or position causes the orgasms. Becca might cum multiple times or her partner might cum first (and last). Choices will be offered for wear a man might cum. If condoms are owned, the choice to wear a condom (or not) will be offered. *NOTE: At this time, there are no consequences for unprotected sex, but this will change in the future.*

NOTE: As of version 0.5.1, the following scenes have been updated to this new system:

- James, first date
- Shaun, kitchen after going to the club twice
- Shaun, bedroom after becoming "friends with benefits"
- James, meeting after the first date

Remaining sex scenes will be converted in future versions, and new sex scenes will be created within this system.

Scene Guide

Repeatable and Random Scenes

Arousal:

Becca can turn herself on in the following ways:

- Bedroom, using her laptop, visit erotic literature website
- (*After suggestion from Emily*) Bedroom, using her laptop, watch porn
- (*After suggestion from Emily*) Living room, watching TV, watch porn

Becca can masturbate in the above scenarios if her *Arousal* is over 50.

Masturbation:

If Becca's *Arousal* is at least 50, she can masturbate in the following locations:

- Bedroom
- Bathroom, taking a shower
- Bathroom, taking a bath
- While peeking in a few scenarios (*see below*)

Voyeurism:

Becca can peek at others at the following times and locations:

1. **Bathroom:** You can peek on Bobby and Shaun any time they take a shower. See "Roommate Schedule" for exact times.
2. **Bobby's Room:** On Saturday nights, Bobby has company. Becca can peek on them.
3. **Roof Deck:** A daring couple will appear there randomly. When they do, *Take a peek*.
4. **Spencer's Bar (Working):** During the random working scenes when Becca is working as a Bartender, sometimes she will walk in on a couple in the storeroom. *Currently no options.*

Becca can also masturbate when peeking if her *Arousal* is over 50, in all scenes except the bar. Just be careful that you don't get caught!

Bestie Gone Bad:

Becca's new bestie is not the most well-behaved young lady:

- During the random working scenes when Becca is working in the Bookstore, Abby visits and flashes Becca as she leaves.

“New Phone, Who Dis?”

You may have noticed that Becca has given out her phone number to a couple of guys while working as a waitress at the Diner. Every so often, randomly, one of these guys will respond by sending her an anonymous text message.

Wardrobe Malfunctions

Some interesting scenes appear randomly at times when Becca is wearing more *risqué* clothing choices:

- Various times and places in the apartment, based on different wardrobe choices.
These are still under development and new media, options, and events will continue to be added over the next few versions.
- Visiting the convenience store without wearing a bra.
- Leaving the convenience store without a bra at night.
- Walking uptown or downtown from home in a skirt without panties.

Major Events

IHOH has many sand-box elements to it, making many of the following events able to be started at any time in the game. We have attempted to make sure that multiple events will not happen (or be scheduled to happen) at the same time; however, do your best not to schedule more than one event at the same time!

We have also noted options in the game designed to end any undesirable paths. Selecting these options will permanently end all future sexual content with that character. It may even cause some characters to disappear from Becca's life altogether!

One major change in version 0.4.0 is that Becca can now lose her virginity to James, Bobby, or Shaun. The text of sex scenes will be different if she is a virgin the first time she has sex with one of these three characters. Her options for losing her virginity may expand in future versions.

The following instructions assume that Becca wants to experience all events with all characters. Other options are available that will change the outcome of the scene.

The fifth scene with Tyler will randomly repeat as a work scene. To see the full scene each time, always choose to Continue / Take another shot. You can also end the scene at several points prior to its conclusion.
2. *If Becca does not work as a Bartender:* This path consists of five sequential scenes that will appear randomly when you “Sit at the bar.” Otherwise content is as above.
